SUMMARY

Early-career full-stack developer and AI builder with a genuine pull toward social-impact work. Currently serving as the sole technical resource for Ma'an Academy, a Tampa-area non-profit, where I provide IT support and am building their website end-to-end. Shipped an AI-powered resume scanner at a university internship; completed an intensive Codeboxx program delivering MERN apps, a Spring Boot REST API (114 passing tests), a React Native mobile app, and a full DevOps/CI-CD pipeline. Built Arvynna AI, an AI automation services platform, independently. Experienced teaching and translating technical concepts to non-technical audiences — through youth coaching, community IT support, and retail technology sales. Bilingual in English and Arabic.

EXPERIENCE

IT Support & Web Developer

Ma'an Academy (Non-Profit) · 2024 – Present

- Serve as the primary technical resource for a Tampa-area Islamic non-profit, supporting staff and leadership with IT needs, device setup, and day-to-day digital operations across the organization.
- Building the organization's website end-to-end — scoping requirements with non-technical stakeholders, designing architecture, and managing all implementation independently.
- Enable non-technical colleagues to use and maintain technology tools, acting as the person others go to with any technical question — a direct parallel to the Fellow's 'enable the organization' mandate.

Full-Stack Developer (Business Simulation)

Codeboxx Academy · Mar 2026 – Jun 2026

- Shipped production-grade software across four project tracks: MERN stack web applications, a Spring Boot REST API with 114 passing tests, a React Native mobile app, and a full DevOps/CI-CD pipeline.
- Worked in sprint cycles with client deliverables, stakeholder communication, and agile retrospectives — covering the full arc from discovery and scoping through build, testing, documentation, and handoff.
- Integrated AI/LLM tools into project solutions and authored runbooks to ensure teammates could own the work after delivery.

Technology Intern

University of Cincinnati · Jun 2024 – Jul 2024

- Built an AI-powered resume scanner application end-to-end — from feature scoping through implementation and quality testing — contributing to a real production deployment.
- Collaborated with professional engineers, reinforcing software delivery best practices and structured QA.

Sales Associate

Best Buy · Sept 2025 – Present

- Translate complex technology products into clear recommendations for non-technical customers daily — developing a reliable instinct for reading whether an explanation is landing and adjusting on the fly.
- Operate autonomously in a fast-paced environment serving hundreds of customers with varied technical backgrounds.

Basketball Coach

Self-Employed (Community Youth Program) · 2023 – 2024

- Designed individualized training curricula for youth athletes in the Tampa community and built a client base through grassroots outreach — demonstrating initiative, curriculum design, and sustained community engagement.
- Mentored young athletes toward measurable improvement, developing the ability to deliver structured instruction to a non-technical audience and read whether it's working.

PROJECTS

Arvynna AI

Solo Project · 2025

- Independently scoped, designed, and deployed a client-facing website advertising AI automation consulting services to small businesses — demonstrating both technical execution and the ability to translate AI capabilities into business value for non-technical clients.
- Handled all aspects end-to-end: UI design, development, deployment, and service framing.

Ma'an Academy Website

Non-Profit Community Project · 2025 – Present

- Building a full website for a non-profit community organization — managing discovery, architecture, development, and stakeholder communication independently.
- Applying full-stack skills (React front-end, Node/Express back-end) in a real organizational context with non-technical decision-makers as the primary stakeholders.

TECHNICAL SKILLS

Languages:	JavaScript / TypeScript, Java, Python, HTML, CSS
Frameworks:	React, Node.js, Express, React Native, Spring Boot, Next.js
Databases:	MongoDB, SQL
Tools & Infra:	Git, GitHub, VS Code, AWS, Docker, REST APIs, Claude API, CI/CD pipelines
Concepts:	Full-Stack Dev, AI/LLM Integration, Agile/Scrum, Sprint Planning, DevOps, API Design

EDUCATION

Hillsborough Community College — Tampa, FL	<i>Expected: Summer 2026</i>
Associate of Arts (In Progress) · Planned Transfer: University of South Florida	
Codeboxx Academy — Full Stack Development Certificate	<i>Mar – Jun 2026</i>
Bayaan Academy — High School Diploma	<i>2025</i>

CERTIFICATIONS

- University of Cincinnati — Technology Internship Certificate (2024)
- Coursera: Java Programming (2 certificates)
- Coursera: Python Programming
- Anthropic: AI Fluency Framework Foundations (completed)
- Anthropic: Claude 101 (completed)

LANGUAGES

English (Native) · Arabic (Fluent)
